

To provide high-quality dairy products to nation, with a focus on safety and nutrition, “PureMILK” was started their operations in 1980. PureMILK is the largest milk producer in Sri Lanka employing nearly 1,000 workers in their 5 Factories situated in Colombo, Nuwalaeliya, Digana, Polonnaruwa and Kilinochchi. There are 25 chilling centres spread across the District of Sri Lanka and Specific chilling center is attached to one of the below mention factories.

- **Colombo Factory** – Gampaha, Colombo, Kalutara, Puttalam and Ratnapura
- **Nuwalaeliya Factory** – Nuwara Eliya, Badulla, Monaragala, Hambantota, Matara and Galle
- **Digana Factory** – Matale, Kandy, Kegalle and Kurunegala
- **Polonnaruwa Factory** – Anuradhapura, Polonnaruwa, Trincomalee, Batticaloa and Ampara
- **Kilinochchi Factory** – Jaffna, Kilinochchi, Mannar, Mullaitivu and Vavuniya

PureMILK has been in existence for 40 years and has completely depended on local farmers who help the country in the long run. They are interest in wide verity of milk products including bottled fresh milk, packeted fresh milk, flavored milk, yoghurt, butter, sterilized milk and ice cream for the entire country. PureMILK buys the milk from the farmers daily and operates 25 chilling centers situated country wide. Around 60,000 farmers and their families depend on this company which buys the milk from their farms, and they have become active members in supplying milk to PureMILK.

Milk related products are very vulnerable to weather conditions and therefore, factories need to maintain strict conditions to make sure a pure, clean and a healthy production process is carried out. PureMILK operates and reaches their customers through an island-wide dealer network. In order to maintain quality, the dealer network also needs to be given freezer facilities.

The top management of the company is looking into new markets as well as new and innovative products. They are also looking at possibilities on how to make the dealers loyal towards their products to maintain the strong dealer network they have which spans across the island. Strategic alliances with the right parties will definitely help the company to re-establish their market share and maintain it to be the number one milk-based product manufacturer for years to come.

A database is a well-organized list of data that provides a way of finding and managing information quickly and easily. You are supposed to develop a suitable database system to handle PureMILK’s business data efficiently.
